

Australian Full Fat Soybean Meal

Glycine Max, commonly known as soybean, is an annual legume of the pea family. The Soybean plant can reach more than 2m tall and produces either white or purple flowers. The seeds can come in shades of brown, black, green, yellow or sometimes a bicoloured shade.

The soybean is one of the healthiest and most cost-effective sources of protein.
It acts as part of a dietary intake of people and animals in many countries around the world.

PROFEEDS NQ PRIDES ITSELF IN PRODUCING A PREMIUM QUALITY FULL FAT SOYBEAN MEAL. THIS PRODUCT IS:

- High in protein & energy
- 100% soybean
- 2 x the protein of Copra meal
- Rich in Amino Acids for muscle growth
- Extremely digestible
- No impurities - all grain is graded prior to processing
- Promotes good health
- Restores lost condition and topline
- Processed and bagged freshly on the Atherton Tablelands

HOW TO USE FULL FAT SOYBEAN MEAL AS PART OF YOUR ANIMAL'S DIETARY INTAKE

Introduce gradually over a period 1-2 weeks.
Suggested maximum inclusion rates in total diet:

- Pigs: 10%
- Poultry: 10-15%
- Cattle: 10%
- Horses: 10%

*Note: when considering adding soybean meal to a supplement program it is recommended to seek veterinary/nutritionist advice.
